

### Masked avenger

**OMVEDA Skin Rejuvenator Mask** contains almond, saffron, lentils and Ayurvedic herbs to target blemishes, dryness, dehydration, dullness and uneven tone. It is used in the OmVeda Rejuvenator Facial, which helps deep cleanse the skin, balance the delicate acid mantle and renew. Mixed with yoghurt, the mask helps skin look supple and smooth. The wheat grains, bael fruit and nutmeg offer a deep cleansing effect. Saffron's soothing properties promote clarity, while almond nourishes skin.

## RUB-A-DUB DETOX

**OmVeda's Body Detox heating therapy treatment helps stimulate the lymphatic system, releasing toxins.** It combines a firm

Ayurvedic massage and active herbs to increase circulation and reduce fluid retention. A stimulating marma point massage using warmed Raksha Oil encourages lymphatic flow. The treatment includes a body steam and active exfoliation to further cleanse. A neem, yoghurt and turmeric mask is then applied and the area wrapped for 20 minutes. The mask is quickly rolled off the skin using quick massage strokes. Finally, there is a massage using Turmeric Cream, rich in antioxidants like vitamin C. A series is recommended for best results.
